

1. Set **User Account Control Settings** to “Never notify”. Get to these settings by opening up Control Panel and clicking on **User Accounts**. A reboot of the computer is required after you make this change.

2. After reboot, open up Internet Explorer and click on **Tools**, then click on **Internet Options**.

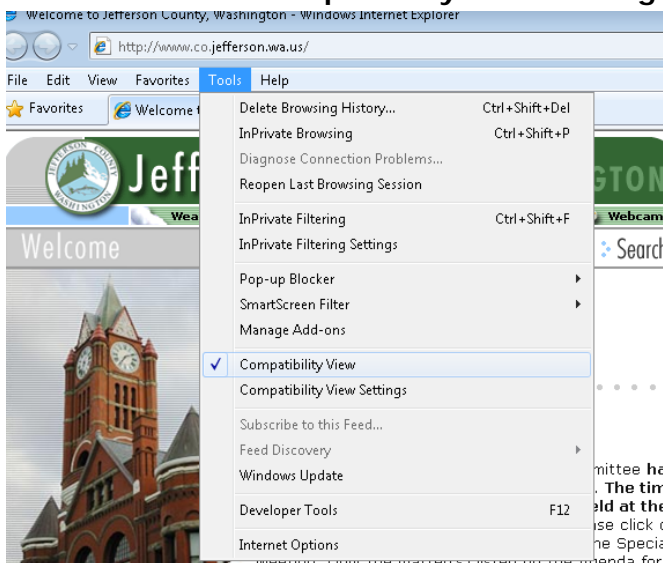

- Next go to the **Advanced** tab and scroll down to the **Security** section and un-check the option titled "Enable memory protection to help mitigate online attacks" click on OK.
