

## Contracts

One of the goals listed in the County's Solid Waste Management Plan is to "promote the use of private industry to carry out the components of the solid waste system, if feasible. Many elements of the County's solid waste program are conducted through service contracts. Some elements of the program are conducted by other local government agencies through Interlocal Government Agreements - for example, the closed landfill monitoring performed by the Jefferson County Conservation District - which builds institutional knowledge and expertise while keeping our money working locally. Other programs such as Public Health's clean-up of illegal dumping on private property are supported with fees charged to our solid waste customers and made available through an interagency transfer of funds.

Below is a list of the types of services provided through contracts, Interlocal Government Agreements and Interagency Fund Transfers.
