13 Attached Documents: 2007 American Planning Association Policy Guide on Community and Regional
14 Food Planning; 2007 American Public Health Association policy statement "Toward a Healthy, Sustainable
15 Food System"; 2010 American Dietetic Association, American Nurses Association, American Planning
16 Association, and American Public Health Association policy statement titled "Principles of a Healthy,
17 Sustainable Food System"; Jefferson County Food Security Partner List
18

19 WHEREAS, food and water are sustaining and enduring necessities and are among the basic
20 essentials for life; and
21

22 WHEREAS, the "food system" is defined as the agents and institutions responsible for production,
23 processing, distribution, access, consumption, and disposal of food; and
24

25 WHEREAS, "local food" is defined as seasonal, fresh food harvested and processed within or as
26 near to Jefferson County as possible; and
27

28 WHEREAS, "local food activities" is defined as those activities related to the food system, from
29 production to consumption to waste management, occurring within or as near to Jefferson County as
30 possible; and
31

32 WHEREAS, a "healthy, sustainable food system" is defined by the principals contained in the
33 2010 American Dietetic Association, American Nurses Association, American Planning Association, and
34 American Public Health Association policy statement titled "Principles of a Healthy, Sustainable Food
35 System"; and
36

37 WHEREAS, "food miles" is defined as the mileage food travels between production and the
38 consumer and is a good indicator of the environmental impact of the food and its components
39

40 WHEREAS, the Jefferson County food system is influenced by many elements of the Jefferson
41 County Code and areas of planning that include housing, transportation and infrastructure development;
42 and
43

44 WHEREAS, among the Community Vision Statements of the Jefferson County Comprehensive
45 Plan is: the support and encouragement of economic opportunities; the increase in housing choices for all
46 residents; the protection and retention of rural lifestyles; the protection and conservation of agriculture,
47 forest and mineral resource lands; respect of property rights, and; the encouragement of citizen
48 participation and involvement; and
49

50 WHEREAS, improving our local food system advances the 2010 Jefferson County Strategic Plan
51 2010–2011 Priorities of: strengthening the efficiency and quality of County Services; planning for the
52 future and; supporting our unique communities; and,
53

54 WHEREAS, improving our local food system advances the 2010 Jefferson County Strategic Plan
55 budget goals of: enhancing the health & quality of life of individuals, families and communities; forging
56 and implementing a shared public/private economic development strategy; using county government to
advocate for the interests of each community; beginning work on the 2014 Update of the County's

57 Comprehensive Plan; identifying and working to fill community infrastructure gaps; strengthening
58 community assets and implementing the County's Transportation Improvement Program (TIP); protecting
59 working forests from conversion for development; collaborating with other jurisdictions and the private
60 sector to meet long-term water needs; continuing to improve a coordinated permitting process by the
61 County so applicants have consistent answers in the shortest time within our resources; working with
62 government & non-governmental organizations to increase affordable housing; maintaining a healthy
63 environment to support important shellfish, fisheries, agriculture, timber & tourism industries; utilizing,
64 empowering and supporting community volunteers; regularly conducting community meetings of elected
65 officials & citizens; promoting open civil dialogue between county government and those served; and
66

67 WHEREAS, hunger and food insecurity are important issues that most adversely affect low-
68 income and minority populations; and
69

70 WHEREAS, the second leading cause of premature death among United States adults is chronic
71 disease, for example heart disease, stroke and hypertension, linked to diet and low physical activity; and
72

73 WHEREAS, obesity and associated costs and diet-related diseases significantly impact the health
74 of Jefferson County residents, and
75

76 WHEREAS, maintaining and improving the security of our local food supply is essential to local
77 emergency preparedness and local self-reliance; and
78

79 WHEREAS, there are significant community-building benefits to community gardening and
80 school garden programs; and
81

82 WHEREAS, a school garden based program in Jefferson County has demonstrated a positive
83 influence on student achievement; and
84

85 WHEREAS, the food system represents an important part of community and regional economies;
86 and
87

88 WHEREAS, value-added food products are estimated to have sixteen times the retail value to
89 local producers over raw products; and
90

91 WHEREAS, Aquaculture in Jefferson County is a major employer and source of revenue for the
92 county and completely dependent on the ready and uniform availability of clean water, and
93

94 WHEREAS, agro-tourism is a growing industry; and
95

96 WHEREAS, the United States Department of Agriculture 2007 census indicates that the average
97 age of American farmers increased from 50.3 in 1978 to 57.1 in 2007 with the majority of farm operators
98 between the ages of 45 and 64 and farmers aged 65 and older comprise the fastest growing group of farm
99 operators; and
100

101 WHEREAS, many young farmers have limited access to capital which challenges farmland
102 preservation and future food production; and
103

104 WHEREAS, food system activities take up a significant amount of urban and regional land; and
105

106 WHEREAS, the food system consumes a major amount of fossil fuel energy, land area, and water
107 in production, processing, transportation, and disposal activities; and
108

109 WHEREAS, the 2008 Jefferson County Solid Waste Master Plan lists waste reduction as the
110 highest order goal; and
111

112 WHEREAS, an estimated fifteen percent of all solid waste in Jefferson County is food waste; and

WHEREAS, gray-water, food waste, animal manures, animal bedding, spoilt silage, yard debris and many other organic materials should be seen as valuable resources essential for building soil fertility; and

WHEREAS, the American Planning Association Board of Directors adopted on April 15, 2007 a Policy Guide on Community and Regional Food Planning recommending the inclusion of food policies in local and regional plans and the American Public Health Association adopted a policy on November 6, 2007 entitled "Toward a Healthy, Sustainable Food System", recommending a food system approach as key to better human health and environmental quality and in June of 2010, the American Dietetic Association, American Nurses Association, American Planning Association, and American Public Health Association initiated a collaborative process to develop a set of shared food system principles and these principles have been published as "Principles of a Healthy, Sustainable Food System" ; and

WHEREAS, over one hundred fifty cities and regions have established Food Policy Councils

NOW, THEREFORE, BE IT RESOLVED that:

The Jefferson County Board of County Commissioners does hereby support the formation of a Food Policy Council (FPC) as the outcome of the collaborative work of all segments of the county's food system in producing the Assessment and Report as described in Section 3 as follows.

The Board of County Commissioners shall consider the recommendations of the Planning Commission in defining the FPC's: mission; structure; member selection, member appointment and recommendation-making process; and schedule. The composition of the FPC shall be broad based and inclusive so that the widest possible diversity of opinion, experience and perspective can inform Jefferson County's Food Policy. The Planning Commission's recommendations should be based on the needs and wishes of those partners representing all segments of the county's food system who will have assisted with the production of the Assessment and Report as described in Section 3 as follows.

Section 1. Goals. These goals are meant to provide guidance for analysis, program development, policy development and actions related to Jefferson County and the region's food system sustainability and security. The overall intent of this local food action initiative is to create a healthy, sustainable local food system and in doing so, advance the County's interrelated goals of environmental sustainability, economic development, public health and emergency preparedness. These goals include:

- a. Strengthen community and regional food systems by linking food production, processing, distribution, consumption, and waste management to increase self-reliance on local food resources
- b. Encourage activities within a regional food system that strengthen Jefferson County's ecological and economic health
- c. Ensure that no Jefferson County resident experiences hunger and promote strategies that create the systemic change necessary to eliminate the need for emergency and charity-based food sources
- d. Ensure that access to local, safe and nutritious food is not limited by economic status, location, or other factors beyond residents' control, prioritizing underserved residents
- e. Support food system activities that encourage the use of local and renewable energy resources and minimize energy use and waste including:

- Reducing food in our waste stream, and
 - Discouraging or restricting excessive and environmentally inappropriate food packaging at all levels of the food system (production, wholesale, retail and consumer), and
 - Reducing the embedded and distributed climate impacts of Jefferson County's food system, and
 - Reducing food miles, and
 - Promote energy efficiency at all stages of the food system by promoting local, sustainable food production, and
 - Incorporate “green business” principles (such as energy efficiency and water conservation) for all food-related businesses in Jefferson, and encourage the adoption of clean technologies and renewable energy sources into all food system industries, and
 - Promote a “closed-loop” food system that emphasizes eliminating pollution, consumption of non-renewable materials and the use of non-compostable food packaging, and
 - Promote food scrap composting by Jefferson County’s residents and businesses, and encourage the utilization of food scraps as compost for Jefferson County’s urban agriculture and community garden programs, as well as regional foodshed agriculture.
- f. Stimulate demand for healthy foods, especially in low-income communities, through collaboration with community-based organizations and institutions
- g. Support the development of balanced food environments that allow residents the opportunities to make healthy food choices and reduce environmental causes of obesity, diabetes, heart disease, and other diet-related illnesses. Prioritize improving food environments in communities that suffer from disproportionately high rates of diet-related disease and that are underserved by full-service grocery stores, farmers’ markets, community gardens, and other healthy, fresh food options
- h. Increase access for all of Jefferson County's residents to healthy and local foods through:
- Increasing opportunities for Jefferson County's residents to purchase and grow healthy food in Jefferson County
 - Dissemination of food preparation and preservation knowledge through educational programs
 - Supporting new opportunities for distribution of locally and regionally produced food
 - Addressing disparities in access to healthy foods in inadequately served populations and neighborhoods
 - Supporting increased recovery of surplus edible food from businesses and institutions for distribution to food banks and meal programs
 - Addressing the needs of vulnerable populations, such as children, people living with disabilities and seniors to accessing adequate, healthy food
 - Increasing the amount of fresh fruits, vegetables, dairy and meat in the food support system, including food banks, school and hospital meal programs
- i. Incentivize new models of land ownership which acknowledge the limited access next-generation farmers have to start-up capital and ensure the intergenerational transition of farm land
- j. Integrate food system policies and planning into County land use, transportation and other planning activities
- k. Develop and enhance partnerships within the County, as well as regionally, to research and promote local solutions to food issues

- l. Establish a strong interdepartmental focus among County departments on programs and policies affecting food system sustainability and security
 - m. Support procurement policies that favor local and regional food sourcing
 - n. Enhance emergency preparedness related to food storage, access and distribution including working toward the goal of establishing a capacity for feeding the population without food importation.
 - o. Support local agriculture that is economically viable, environmentally sustainable and socially responsible by serving as a market for processing and consuming local food. Promote policies and programs that aim toward increasing the consumption of food produced within Jefferson County's foodshed to 30% of all food consumed by supporting such activities and endeavors as:
 - local sourcing or purchasing agreements, farmers' markets, and Community Supported Agriculture
 - Advocate for regional Smart Growth policies that direct growth away from agricultural soil
 - Maximize Jefferson County's self reliance and capability to grow and provide sustainable and nutritious local food for its citizens through urban agriculture initiatives such as community farms and gardens, rooftop gardens, and building code recommendations for edible landscaping
 - p. Support the preservation of environmental resources by reducing food miles and increasing the consumption of food grown using local inputs as well as less chemical, water, and energy-intensive production, processing, and distribution practices
 - q. Support local agricultural activities as a method of preserving open space.

253 Section

- 254 2. Assessment and Report. This resolution commits the County to the development of local
255 food system security. Recommended actions should follow from a comprehensive assessment of
256 Jefferson County's current level of food system security. This assessment should be based on
257 high-quality data as provided by all those who contribute to the food system; from producers to
258 distributors to consumers to waste recyclers and managers. Therefore, the Jefferson County
259 Board of County Commissioners hereby requests that the Jefferson County Planning
260 Commission (Planning Commission) and, once formed, the FPC, commence work at the earliest
261 possible date in three areas of focus:
262
- a. The Planning Commission, with the aid of County staff, and in partnership with other
263 volunteer groups as the Planning Commission sees fit, is requested to initiate a county-
264 wide series of neighborhood discussion groups focused on the needs and aspirations of all
265 segments of the food system
266
267
 - b. The Planning Commission, with the aid of County staff, and in partnership with other
268 volunteer groups as the Planning Commission sees fit, is requested to identify potential
269 partners who could assist in gathering quality data from all segments of the food system.
270 Potential partners include, but are not limited to: membership organizations; non-profit
271 service organizations; industry trade associations; volunteer groups; and centers of
272 education. The Planning Commission is further requested to seek the assistance of these
273 organizations in gathering feedback from those segments of the community they serve or
274 represent concerning the creation of a healthy, sustainable food system
275
276
 - c. The Planning Commission with the aid of County staff, and in partnership with other
277 volunteer groups as the Planning Commission sees fit, is requested to submit a report to
278

279 the Board of County Commissioners within one year of the date of this Resolution which
280 should, at a minimum:

- 281
- 282 ➤ summarize the findings of the community dialogue meetings
- 283 ➤ summarize the findings of the public outreach conducted by partner organizations
- 284 ➤ identify barriers to the goal of creating a healthy, sustainable food system within the
- 285 Jefferson County Comprehensive Plan (Plan)
- 286 ➤ make recommendations for changes to the Plan that would remove such impediments
- 287 ➤ make recommendations for changes to the Plan that would help to create a healthy,
- 288 sustainable local food system
- 289 ➤ Identify regulatory impediments to the goal of creating a healthy, sustainable food system
- 290 that fall outside the purview of the Planning Commission's directive
- 291 ➤ make recommendations as to the creation of a Food Policy Council including, but not
- 292 limited to, the FPC's mission; member selection, member appointment and
- 293 recommendation- making process; structure; and schedule
- 294

295 Section 3.City/County Coordination. The County requests that the City of Port Townsend
296 recognizes the important role of food policy in regional and local planning and invites the City
297 to assist in creating a healthy, sustainable local food system
298

299 Section 4.Learning Centers. The County supports the development of a partnership with
300 universities, colleges, technical schools and other centers of learning or learning programs to
301 assist in the development of a Food Action Plan and other policy and technical analysis that
302 contributes to meeting the goals in Section 1
303

304 Section 5.Collaborative Design. The County supports development of a partnership with
305 individuals or groups in the fields of agronomy, water conservation, Permaculture, appropriate
306 technology, food processing, product marketing, food distribution, food justice, participatory
307 planning and processes, and all others that contribute to meeting the goals in Section 1
308

309 Section 6.State Leadership. The County calls upon the State Department of Agriculture to
310 increase its role in working toward a state food policy consonant with the goals in Section 1
311
