

Shoreline Master Program Comprehensive Update

SMP Open House

Community Events for Public Outreach & Involvement

Jefferson County is updating the Shoreline

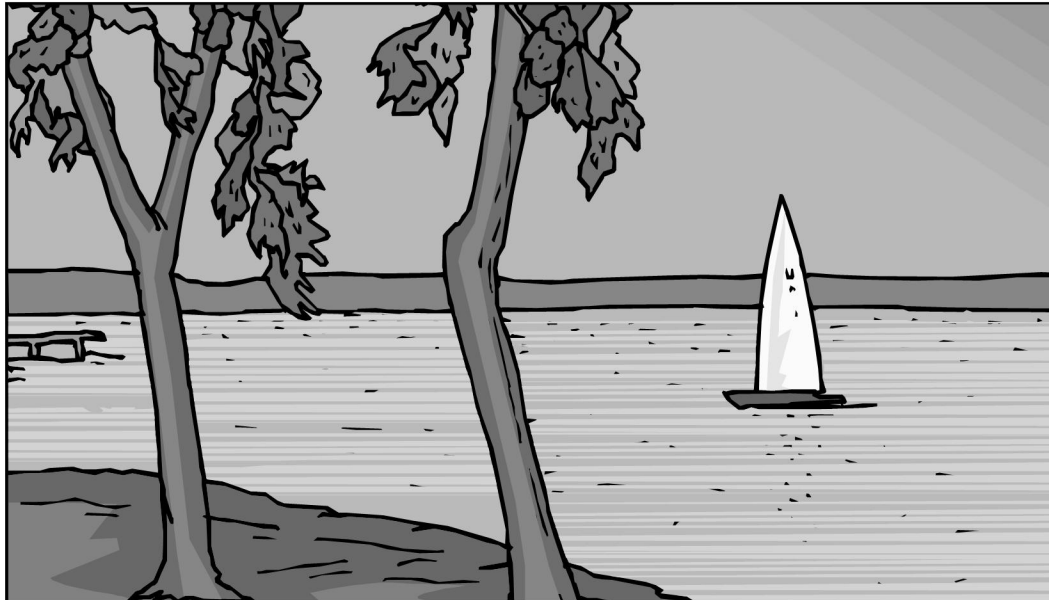

Master Program (SMP) as required by State legislation.

SMP policies & regulations apply to development and land use activities along freshwater and marine Shorelines of the State.

Learn more about the status of this project and provide input by attending an Open House event near you this fall.

Each drop-in event will feature poster displays, a repeating slideshow, comment forms, and an interactive digital mapping station with staff & volunteers to answer questions.

In case you can't attend or want to provide additional input, a comment form will be available online.
