Subject: Dump Trucks, Call for Bids

Statement of Issue:

Call for bids for the supply of five-yard and ten-yard dump trucks as needed from time to time over five years by the Department of Public Works.

Analysis/Strategic Goals/Pros & Cons:

Fleet Services is proposing a bid for a five-year contract for large and mid-size dump trucks for Public Works. Long-term standardization reduces upfitting costs, allows reassignment within the fleet and helps fleet technicians become familiar with the model and how best to support it.

Fiscal Impact/Cost Benefit Analysis:

Replacement of five- and ten-yard dump trucks is behind schedule, leading to decreased operational efficiency and additional unscheduled and expensive repairs. Lifecycle costs are higher than should accumulate with scheduled replacements.

Being behind schedule also means a backlog of purchases. Replacement of both types of trucks, as well as their companion snowplows and spreaders, will begin as soon as the contract is awarded and will be spread over the next five years.

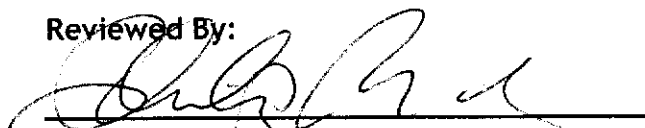

Recommendation:

Approve the attached Call for Bids and set the bid opening for 10:45am on Monday, August 18, 2014.
