Subject: Midsize Hybrid Sedans, Call for Bids

Statement of Issue:

Call for bids for the supply of midsize hybrid sedans as needed from time to time over five years for various departments.

Analysis/Strategic Goals/Pros & Cons:

Fleet Services is proposing a bid for a five-year contract for a single model of midsize hybrid sedan to provide an efficient form of transportation where compact sedans are inadequate. Long-term standardization helps fleet technicians become familiar with the model and how best to support it.

Fiscal Impact/Cost Benefit Analysis:

Midsize hybrid sedans are nearly as efficient and ranked very low in overall lifecycle cost out of a variety of suitable vehicles in Fleet Services' analysis for County departments that average 12,000 miles per year. This class of vehicle is expected to fill needs for which compact cars are too small, such as the carrying of several passengers or larger equipment; it will be proposed in lieu of larger vehicles where practical. Actual purchases off the resultant contract will be dependent upon requirements due to existing vehicles reaching their economic end of life.

Recommendation:

Approve the Call for Bids and set the bid opening for 10 AM on September 8, 2014.
