* Handle with care to PREVENT BREAKAGE and the release of mercury vapor

** Place in red sharps container OR plastic soda bottle. Secure lid with tape and place on top of trash (curbside) or alert transfer station attendant.

---

**TIPS — TRANSPORT & DISPOSAL**

- Secure your load; keep upright
- Label or identify waste
- Leaks can begin during transport
- Transport in lined cardboard boxes

---

**Latex / Acrylic Paint** is non-hazardous and is NOT accepted as HHW.

**Re-use:** Check with used building materials stores for acceptance of full, properly labeled paint cans.

**Disposal:**

1. Mix 1 part absorbent* into 1 part latex paint. Paint cans more than half full can be mixed with absorbent in a lined cardboard box. **cat litter, wood stove pellets, dry sawdust, concrete mix**
2. Stir in absorbent until paint has a non-pourable oatmeal-like consistency (drier is better).
3. Allow the mixture to sit for at least one hour.
4. With paint lids removed, dispose of the thickened paint with regular household trash.
