Non-Disturbed Area (Soil Amendment Not Required)

- All areas disturbed and not covered with an impermeable surface must be amended for the soil amendment details below.
- Label all areas disturbed and not covered with an impermeable surface.
- Do not reference an alternate plan sheet.

DEFINITIONS:

Non-Disturbed Area (ND): Vegetated areas that will not be subject to land disturbing activity or the required soil amendment if they are permanently protected throughout construction. The plan must be in place and the required soil amendment inspected. Refer to Section A-A for elevation variances.

- Disturbed activity does not require soil amendment if they are fenced and continuously protected throughout construction. The perimeter must be in place and the required soil amendment inspected. Refer to Section A-A for elevation variances.

Soil Amendment Area (SA): Vegetated or compost areas (turf and landscape) that have not been covered by an impervious surface, incorporated into a drainage facility, or engineered as structural fill or slope. See definitions and labeling. Do not reference an alternate plan sheet.

Post-Construction Soil Quality & Depth

- Non-disturbed soils are not subject to land disturbing activity or require soil amendment if they are permanently protected throughout construction. The plan must be in place and the required soil amendment inspected. Refer to Section A-A for elevation variances.

- Disturbed activity does not require soil amendment if they are fenced and continuously protected throughout construction. The perimeter must be in place and the required soil amendment inspected. Refer to Section A-A for elevation variances.

DEFINITIONS:

Soil Amendment Area (SA): Vegetated or compost areas (turf and landscape) that have not been covered by an impervious surface, incorporated into a drainage facility, or engineered as structural fill or slope. See definitions and labeling. Do not reference an alternate plan sheet.

Perforated Stub-out Connection

See the DOE Manual, Volume 3, for requirements.

Drywell

- A rough-in inspection is required prior to infiltration facility or pipe burial. Call 360-379-4455 to schedule an inspection.

Raingarden or Bioretention

Site plan looking too crowded? Use the letters on this page as reference instead of drawing the BMP. Be sure to indicate location, sizing (if applicable) and pipe locations.

REFERENCE A1A - Permanent Stormwater BMP Options

Utilization of this template is optional if elected by the applicant for use. The BMPs shown on this sheet must be built as specified here and in the most recent DOE manual. If any conflict exists, the DOE manual supersedes.
