

Jefferson County Public Health's mission is to protect the health of all Jefferson County residents by promoting safe, healthy communities and environments.

JCPH works with county, state, and federal governments, non-profit organizations, and private sector partners to keep people from getting sick and to protect them from health threats.

Public Health responds to emerging health threats such as COVID-19, and provides services to individuals and the community.

We are open during COVID-19 pandemic, most services are available by phone.

## COMMUNITY HEALTH PROGRAMS

*ALWAYS WORKING FOR A HEALTHIER AND SAFER JEFFERSON*

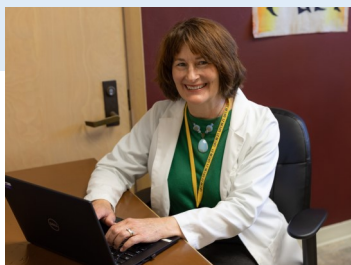

## Clinic Services

### Reproductive and Sexual Health Program

Experienced staff help you meet your needs for reproductive and sexual healthcare: birth control methods, annual exams, emergency contraception, STI diagnosis, treatment and prevention education, partner notification. We help you find answers to your questions and provide referrals.

### Breast and Cervical Health Program

Free women's health exams including pap test and mammogram for financially eligible women 40 and older.

## School Health

### School Based Health Centers

Comprehensive, confidential adolescent health care services for students provided at Chimacum, Port Townsend and Quilcene High Schools including: sports physicals, immunizations, illness or injury exams, reproductive health and mental health counseling.

### Community Prevention and Wellness Initiative

Chimacum, Port Townsend and Quilcene school districts provide a student assistance professional to support middle and high school students' behavioral health, and participates in its own community-member coalitions focused on strengthening factors that protect youth from the risks of early substance use initiation.

### Human Growth and Development Education

5th–9th grade students in Quilcene and Chimacum school districts receive content that meets the 2005 OSPI and WA DOH "Guidelines for Sexual Health Information and Disease Prevention," the Healthy Youth Act of 2007.

## Family Health Services

### WIC Supplemental Nutrition Program

Eligible Women, Infants and Children through age 5 who participate in WIC have improved health through nutrition education, food benefits, and referrals to health and community services. Income guidelines accommodate many working families. Breastfeeding Peer Counselor.

### Maternity Support

Pregnant women achieve their health goals through home, office and telehealth visits that promote and support healthy pregnancies, healthy babies, safe and knowledgeable parenting. Families also receive referrals to important community resources.

### Nurse Family Partnership

First-time pregnant mothers partner with public health nurses during this important time of their life during their pregnancy and until their child's second birthday. Women receive support to achieve their pregnancy health goals, and become knowledgeable, nurturing parents.

### Children and Youth with Special Healthcare Needs

Parents/guardians receive support from Public Health Nurse for children with chronic health conditions and developmental delays. Information on financial resources also provided.

### Breastfeeding Education and Support

The New Moms Tea event is a support group for moms and babies and is held weekly. Call for details.

To schedule an in-person or telehealth appointment for any of these services  
**CALL 360-385-9400**

## Communicable Disease

### Communicable Disease

Keeping the community safe from the spread of disease by investigation and contact tracing of communicable diseases. TB screening and monitoring, testing available for food borne illness and zoonotic disease such as rabies.

### Syringe Exchange Program

Anonymous and confidential walk-in services to decrease the spread of disease by exchanging used syringes for new, safer injection supplies; health care referrals, HIV counseling and testing, hepatitis screening and monitoring, testing available.

## Immunizations

 by appointment

### Childhood Vaccines

Recommended and school required immunizations provided for children ages 0-18 years available.

### Adult Vaccines

Recommended immunizations provided for adults which include Hepatitis A and B and HPV vaccines available.

### International Travelers Clinic

Immunizations and prevention recommendations for trip specific international travel.

## Foot Care

 by appointment call 360-531-4465

Seniors and vulnerable populations maintain mobility with affordable assisted foot care maintenance: filing calluses and corns, cutting nails, and preventing foot wounds.

## Prevention

### Tobacco Prevention and Control

Protecting the community against the burden of the number one preventable cause of illness and death.

### Youth Marijuana Prevention and Education Program

Strives to change policies, systems, and environments to encourage youth to make healthy choices when faced with using marijuana.
